The browsers used in testing are Google Chrome, Mozilla Firefox and Opera

Bugs

—---

- When the search box is left blank and the search button is clicked, the page reloads.
- Error printed to Console: Error with Permissions-Policy header: Unrecognized origin: 'intake-analytics.wikimedia.org'.
- The "sort by relevance" filter cannot be removed with the x button in the Advanced search field.
- When the page is taken to the size of a mobile device and examined, it is observed that it does not have a responsive design.
